

“VASOCAINE”

For Use by Licensed Professionals Only.

This liquid 4 ounce anesthetic comes with both a flip top and a spray top. Developed for relief of anorectal disorders, this powerful 5% lidocaine liquid anesthetic is for use during procedures. It is safe for use on all procedures except eyeliner. It also contains a vascular constrictor to aid in reducing swelling and bleeding.

Vasocaine is a highly effective secondary anesthetic for use during painful procedures. It is fast-acting and powerful, yet has no burn on open skin contact.

FOR EXTERNAL USE ONLY. Check with client for history of allergic reactions to topical anesthetics before applying. Keep in a cool, dark place, out of reach of children.

WARNING: Avoid direct contact with the eyeball. If contact should occur, irrigate with copious amounts of sterile saline and seek medical attention. **DO NOT SWALLOW.** If you should accidentally swallow this product seek medical attention immediately.

SUGGESTED APPLICATIONS:

To Anesthetize
Skin During
A Procedure-

This product is highly effective on broken skin. Use ***Vasocaine*** during tattooing, piercing or other broken skin procedures. ***Vasocaine*** is a strong anesthetic, which hits quickly. Where speed of anesthesia and ease of use are important, just spray or wipe throughout your job, let sit 90 seconds, and you are good to go. Always remove the product thoroughly before tattooing. Because of the added ingredient of a vascular constrictor, you will also experience a reduction in bruising and bleeding with this product. The healing of tattooing is not affected by its continued use throughout a procedure.
